ABOUT ME

I am a creative and motivated individual with experience in full-stack development, data analytics and applied machine learning. I have built intelligent, data-driven applications involving predictive modeling, classification, clustering and data analysis to support decision-making and real-world problem solving. I am skilled in data preprocessing, feature engineering, and model evaluation to extract meaningful insights from complex datasets. I am passionate about artificial intelligence, machine learning and data analytics, with a focus on developing creative, intelligent systems that transform data into actionable insights and improve user experience and business outcomes.

SKILLS

Frontend Development : React.js | Next.js | Flutter | Tailwind CSS | JavaScript | TypeScript | CSS
Backend Development : Python | .NET | Spring Boot | Node.js | Laravel | Django | Flask | Java | PHP | Go
UI/UX Design Tools : Figma | Canva | Stitch
Databases : MySQL | PostgreSQL | MongoDB | SQLite
AI /ML Engineering : TensorFlow | Keras | PyTorch | scikit-learn | RAG | LLMs | NLP | OpenCV Computer Vision | Hugging Face Transformers | MCP (Model Context Protocol)
DevOps & Deployment : Docker | Kubernetes | Git | GitHub | CI/CD | AWS | Vercel | Netlify | Railway
Productivity Tools : VS Code | Colab | IntelliJ IDEA | Postman | FigJam |Antigravity | Cursor | Claude
Other Interests : Artificial Intelligence | Cybersecurity | Blockchain

EDUCATION

BSc. in Information Technology (Reading – Final Year)
Rajarata University of Sri Lanka
Sep 2022 – Present

PROJECT WORK

Class Pulse: AI-Powered Real Time Engagement System.
Developed a web-based real-time video conferencing learning analytics system for real-time engagement using K-Means clustering to classify student engagement and a rule-based engine to generate personalized feedback based on behavioural, performance and network data.

Tech: React 18, TypeScript,TailwindCSS, FastAPI, MongoDB, MySQL, Socket.IO , JWT, AWS, Zoom API
Deployment: AWS EC2, Vercel , Railway
Live Demo: https://www.zoomlearningapp.de/login
GitHub: https://github.com/WafryAhamed/FYP-Class_Pulse

FloodX7 : Intelligent Flood Disaster Management Platform
Developed a real-time AI-powered system for flood prediction, risk assessment, geospatial monitoring, and emergency response coordination using machine learning and GIS mapping, featuring interactive dashboards, citizen reporting and an AI assistant for crisis guidance.

Tech: React, FastAPI, PostgreSQL, PostGIS, Machine Learning, GIS Mapping
GitHub: https://github.com/WafryAhamed/Flood-Prediction-System

VOLUNTEER EXPERIENCE

Mentor - *Hiking Club*
Rajarata University of Sri Lanka
2025-2026

Marketing Director - *Hiking Club*
Rajarata University of Sri Lanka
2024-2025

Head of PR - *English Club*
Rajarata University of Sri Lanka
2024-2025

Volunteer - *IEEE Student Branch*
Rajarata University of Sri Lanka
2025-2026

Volunteer - *ZeroPlastic*
Rajarata University of Sri Lanka
2023-2026

Designer - *AIESEC*
Rajarata University of Sri Lanka
2024-2025

Student Grade Prediction using ANN
Developed a deep learning-based classification system to predict student grades using academic performance and engagement features, optimized with Bayesian hyperparameter tuning for improved accuracy and generalization.

Tech: Python, TensorFlow/Keras, Scikit-learn, Scikit-optimize, NumPy, Pandas, Matplotlib
GitHub:https://github.com/WafryAhamed/Student-Grade-Prediction-using-Artificial-Neural-Networks

Multimodal AI System for PCOS Prediction
Developed a multimodal AI system combining ultrasound image analysis and clinical data using EfficientNet-B0 and ML models (Logistic Regression, Random Forest, Gradient Boosting) with decision-level fusion to improve early PCOS prediction accuracy.

Tech: TensorFlow, Scikit-learn, EfficientNet-B0, OpenCV, Pandas
GitHub: https://github.com/WafryAhamed/InnoX7

Ayurvedic Clinic Booking Application
Designed and developed a mobile full-stack application to digitize appointment scheduling for Ayurvedic wellness clinics in Sri Lanka. Tech: Flutter , ASP.NET Core Web API, PostgreSQL
GitHub: https://github.com/WafryAhamed/Ayurvedic-Clinic-Booking-App

ChefBuddy - Android Meal Planning Application
Developed an Android application to help users decide what to cook, search recipes by ingredients, save favourites and plan meals using a calendar-based interface.
Tech: Java, SQLite
GitHub: https://github.com/WafryAhamed/Daily-Food-Planner-Application

CERTIFICATIONS

Professional Certificate in Agile and SCRUM
Udemy | Dec 2025

Introduction to DevOps & Site Reliability Engineering
The Linux Foundation | Feb 2026

Python for Beginners
University of Moratuwa | Sep 2025

Flutter Masterclass
Udemy | Jan 2026

Machine Learning Foundations
Meritshot Academy |*Udemy* | Jan 2026

ACHIEVEMENTS AND AWARDS

Secured **1st Place** at the INSL North Central Provincial Competition 2025 as a member of Team TechSnatchers.

Secured **1st Place** at the RUSL XTREME Mini-Code Competition 2025 as the Team Leader of Team CodeNova7, Organized by the IEEE Student Branch of Rajarata University of Sri Lanka.

Awarded a **Merit Award** at the Designathon Contest - Codefest 2025, organized by SLIIT, representing Rajarata University of Sri Lanka as a Team Leader of Team InnoX7.

Participated in **UniHack 2025**, Sri Lanka's first inter-university blockchain hackathon, organized by Coin Ceylon in collaboration with the University of Kelaniya and Intersect Sri Lanka Hub

Secured **2nd Place** at the RUSL InnOrbit Project Carnival 2026 organized by the Department of Computing, Faculty of Applied Sciences, Rajarata University of Sri Lanka as part of Team Tech Snatchers.

Secured **2nd Place** at the RUSL XTREME 1.0 Mini Hackathon2024, a segment of the IEEE XTREME Programming Competition 18.0, organized by the IEEE Student Branch RUSL

Secured **2nd Place** in the Individual Front-End Development Competition (React.js), held under WebXplore and organized by the IEEE Student Branch of Rajarata University of Sri Lanka.

Secured 3rd Place in the Individual UI/UX Designing Competition, conducted under WebXplore and organized by the IEEE Student Branch of Rajarata University of Sri Lanka.

Finalist in the Beauty of Cloud Ideathon, Sri Lanka's first inter-university ideathon on cloud computing.

Participated in the CodeRally 6.0 24-Hour Coding Hackathon.
